To Southern Utah University (SUU) Officials and President of Sons of the Utah Pioneers (SUP):

This letter lends support to the further exploration and development of the Context Machine for the organization of data, information, lessons learned, knowledge, and wisdom.

Our Department of Defense customers are driving a transformation of how we manage the information/models leveraged to define, develop, and sustain our products; you can read more about the DOD Digital Engineering strategy here: https://sercuarc.org/wp-content/uploads/2018/06/Digital-Engineering-Strategy_Approved.pdf. Northrop Grumman is at the forefront of defining possible for many new technology developments and we prioritize our investments into mission and technology campaigns several of which relate to the Context Machine underpinnings.

While our primary mission is to advance global security and human discovery in support of our customers' missions around the world, every company will be disrupted by new knowledge management models which requires better methods/tools to respond. Northrop Grumman is actively seeking better methods/tools to organize our flow of information/data/knowledge.

Sincerely,

PAUL NELSON | Chief Technical Strategist, Tech Fellow
